

Technical Recommendations

- **Collection – Gravity System**
 - Gravity Collection in core area
 - Gravity in outlying areas
 - Have flexibility for STEP or grinder pumps in outlying areas, if desired
- **Treatment – Membrane Bioreactor (MBR)**
 - Best effluent quality, easily expandable
 - Appropriate odor control & aesthetics
- **Effluent Disposal/Reuse – Rapid Rate Infiltration**
 - Least costly and easy to implement
- **Solids Handling – Contract Disposal**
 - Contracted haul and disposal to Biorecycle Co. in South Kitsap County
 - Least costly, can change strategy as system develops
